

Flexform Product Comparison

flexform crates:

Ships and stores flat. Can stack several pallets high on the floor or store in racks.

Unload pallets off truck using fork lift

Better density ratings saving freight dollars

Easy to top load finished goods

Offers beam strength in long lengths

Structurally sound and puncture resistant

paper tubes:

Bulky. Takes up a lot of storage space.

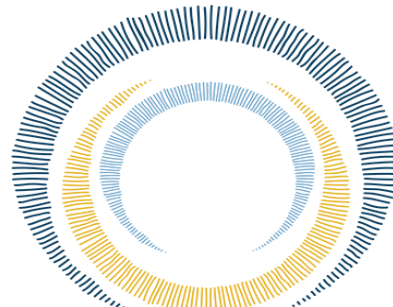

Tubes have to be hand unloaded or unloaded in racks

Poor density ratings. Cost more freight dollars to ship

Difficult to end load finished goods

Little to no beam strength in long lengths

Tubes “unravel” in long lengths and burst like biscuit tubes when impacted
